PROFILE

McGill Artificial Intelligence and Computer Science undergraduate with a Music Technology minor, focused on software development and interactive media. I build browser tools and publishing systems. Available for Summer 2027 internships.

EDUCATION

McGill University 2024 to June 2028 (expected)
BSc, Major in Artificial Intelligence & Computer Science | Minor in Music Technology

TECHNICAL EXPERIENCE

TVM: Student Television at McGill Feb 2026 to Present
Technical Director | Montreal, QC

- Manage a $15,000 camera and equipment budget and maintain inventory for a 150-member student television service supporting campus events and productions.
- Lead student workshops and advise on camera and audio workflows, equipment and production solutions.
- Diagnosed server noise with IPMICFG and power-supply A/B tests; identified a 1 Gb/s NAS bottleneck.

SOFTWARE AND CREATIVE TECHNOLOGY PROJECTS

Grailed Plus 2026
Published Chrome extension; Firefox build support | TypeScript, ONNX Runtime, Node.js

- Extended an open-source extension with Grailed, Depop and eBay comparisons, local MobileCLIP-S1 inference in a Web Worker, and confidence-aware ranking.
- Built an eBay gateway with OAuth token caching, category resolution and parallel text/image search; added pricing insights and currency conversion.

TVM Discord Bot 2026
Membership and production workflows | Node.js, discord.js, SQLite

- Adapted EmailVerify with roster previews, transactional replacement, role reconciliation and private shoot workspaces.
- Tested stale and concurrent confirmations and saved changes whose Discord replies fail, using temporary databases and service adapters.

Photo Node-Gallery 2026
Interactive image discovery | Next.js, TypeScript, D3.js, Supabase, Cloudflare R2

- Built a force-directed photo graph and compared five colour-similarity configurations on a saved 100-photo archive with seven editorially judged query subsets.
- Added atomic graph registration and replay-safe upload recovery; deliver published images from R2 through a shared image/media Worker.

Bot or Not 2026
Bilingual bot detection | Python, scikit-learn, NumPy

- Compared five classifier families for English and French using shard-grouped validation, language-specific thresholds and reproducible selection/prediction reports.

bur1alrites 2026
Moving-image portfolio | Next.js, React Three Fiber, Three.js, HLS

- Built reflective 3D scenes with frame-time quality adaptation and viewport-owned HLS previews with stale-player cleanup and bounded retries.
- Implemented HLS processing and authenticated multipart uploads up to 5 GiB, with part and finalization retries while the page stays open.

Elliot Mairet photography archive 2026
Design and development | Next.js, TypeScript, Supabase, Cloudflare R2

- Built an image archive with palette navigation and authenticated publishing; retained publication identity on retries and tested identical retry payloads after lost responses.

ADDITIONAL EXPERIENCE AND LEADERSHIP

- **Retail Associate, Flying Colours Bermuda:** Handled sales, customer enquiries and stock (May to Jul 2025).
- **Founder, F1 in Schools Club:** Founded a school STEM club and trained members in CAD, marketing and teamwork.

TECHNICAL SKILLS

Programming: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS
ML and web: scikit-learn, ONNX Runtime, React, Next.js, Node.js, D3.js, Three.js, Tailwind CSS
Infrastructure: Supabase, PostgreSQL, Cloudflare R2, Docker, Coolify, Vercel, Git; HLS streaming
Media: OBS, Adobe Creative Suite, DaVinci Resolve, Ableton Live, Blender; AV troubleshooting
