

DEXTER YOUNG

+1 (441) 518-2768 | dextery777@gmail.com | Montreal, QC | [dextery.dev](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

McGill Artificial Intelligence and Computer Science undergraduate with a Music Technology minor, interested in applied machine learning, interactive graphics and media systems. I build browser tools and visual archives, taking projects from interface design and model evaluation through backend integration and deployment.

EDUCATION

McGill University 2024 to 2028 (expected)
BSc, Major in Artificial Intelligence & Computer Science | Minor in Music Technology

Trinity College School, Canada 2022 to 2024
High School Diploma | 96% overall average

Additional training: Supervised Machine Learning: Regression and Classification, Coursera (2023).

TECHNICAL EXPERIENCE

TVM: Student Television at McGill Feb 2026 to Present
Technical Director | Montreal, QC

- Manage a \$15,000 camera and equipment budget and maintain inventory for a 150-member student television service supporting campus events and productions.
- Lead student workshops, advise on camera and audio workflows, and research equipment and production solutions.
- Diagnosed server noise using IPMICFG and A/B testing of redundant power supplies, isolating the noisy unit without shutting down the server.
- Identified a 1 Gb/s NAS network bottleneck; evaluated 10 Gb/s upgrades and open-source inventory software.

SOFTWARE AND CREATIVE TECHNOLOGY PROJECTS

Grailed Plus 2026
Published Chrome extension; Firefox support | TypeScript, ONNX Runtime, Node.js

- Extended an open-source extension with Grailed, Depop and eBay comparisons, local MobileCLIP-S1 inference in a Web Worker, and confidence-aware ranking.
- Built an eBay gateway with OAuth token caching, category resolution and parallel text/image search; added pricing insights and currency conversion.

Bot or Not 2026
Bilingual bot detection | Python, scikit-learn, NumPy

- Built separate English and French classifiers, comparing five model candidates with grouped validation and language-specific thresholds.
- Recorded F1 scores of 0.952 (English, 275 accounts) and 1.000 (French, 171 accounts) on separate labelled practice sets.

Photo Node-Gallery 2026
Interactive image discovery | Next.js, TypeScript, D3.js, Supabase

- Built a force-directed photo graph with colour-based discovery; benchmarked five similarity models across 100 photographs and seven editorially labelled queries.
- Added Supabase image transforms and persistent NGINX caching to reuse resized images across visits.

bur1alrites 2026
Moving-image portfolio | Next.js, React Three Fiber, Three.js, HLS

- Built reflective 3D scenes with four quality presets that adapt to frame time; reused one HLS player and video texture for gallery hover previews.
- Implemented 540p/720p/1080p HLS processing and authenticated gallery editing with resumable video uploads up to 5 GiB.

Photography portfolios for Elliot Mairêt and Arnaud Belec 2026
Design and development | Next.js, TypeScript, Supabase, WebGL

- Built photography archives with authenticated uploads, automatic palette extraction and colour-based image discovery.
- Used k-means for Elliot and seven-colour OKLab k-medoids for Arnaud, with interactive WebGL gradients.

ADDITIONAL EXPERIENCE AND LEADERSHIP

- **Retail Associate, Flying Colours Bermuda:** Handled sales, customer enquiries and stock (May to Jul 2025).
- **Founder, F1 in Schools Club:** Founded a school STEM club and trained members in CAD, marketing and teamwork.
- **Director, Student Media Productions:** Led camera setup and multicamera recording for school performances.

TECHNICAL SKILLS

Programming: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS

ML and web: scikit-learn, ONNX Runtime, React, Next.js, Node.js, D3.js, Three.js, Tailwind CSS

Infrastructure: Supabase, PostgreSQL, Docker, Coolify, NGINX, Vercel, Git; HLS streaming

Media: OBS, Adobe Creative Suite, DaVinci Resolve, Ableton Live, Blender; AV troubleshooting
